FUCHSIAS

York Gardens 1961

York Gardens, known for many years as "Fuchsias-by-the-Sea", offers a unique display of beautiful fuchsias new and old — over 150 varieties — in a natural setting among the Oregon coast pines. Worth seeing at any time during blooming season, the Gardens are at their best in July, August and September.

Location is just 2 miles south of Seal Rock, between Newport and Waldport, on the ocean side of Coast Highway 101.

In addition to fine fuchsias, we have, for sale at the Gardens only, many choice **Geraniums, Begonias, and House Plants.**

Plan to Visit York Gardens This Summer!

Fred & Betty Huntress, Owners

FUCHSIAS AVAILABLE

D — Double S — Single tr — Trailing up — Upright

ANGELA LESLIE (1959 - D,up) Large, deep pink double corolla, intensified by rose veins. **Pat.**

ANNA (D,tr) Large red double for basket, strong grower, magenta and carmine.

AVALANCHE (D, semi-tr) Pure star-like corolla, tufted white petals; sepals white and rose-edged.

BALKON (S,tr) Exquisite small vining fuchsia, corolla coral with lighter sepals. Dainty, prolific.

BLOOMER GIRL (D,tr) White corolla veined with red, and upturned red sepals makes a pretty trailer. Heavy bloomer, early.

BLUE BUTTERFLY (1960-S, tr) Long, flaring corolla is violet blue splashed with white, with white sepals. Beautiful.

BLUE PENDANT (D,tr) Double corolla, light blue, with rose sepals. Natural trailer, early blooming.

BLUE WAVES (D,up) Double corolla of campanula violet splashed with rose, and upturned rose sepals. Graceful shape, petals ruffled.

BONNIE BLUE (D,up) One of the truest blues, with white tube and sepals in lovely contrast.

BOUFFANT (S,tr) Long corolla is white, lightly veined pink; tube and spreading sepals are bright red. Heavy bloomer, striking.

CALIFORNIA (S, up) Strong grower, covered with bright orange-pink blossoms; makes fine tree.

CANDLELIGHT (1959-D, up) Rose shaped blossoms, sepals of white flushed pink, and full corolla of soft red and purple shades. A beauty.

CAPRI (1960-D, up) Huge violet and white blooms on strong, arching type plant make this an outstanding new variety.

- CARA MIA (Semi-D, tr) Deep vibrant red corolla and slim pale pink sepals make this a beautiful trailer.
- CHECKERBOARD (S,up) Popular small-flowered fuchsia; loads of bloom, red and white.
- CITY OF PORTLAND (D,up) Large-flowered plant, with red sepals and petunia-purple corolla of lively effect.
- DUSKY ROSE (1960-D,tr) Large, natural trailer with ruffled bloom of charming color changes in coral and raspberry pink shades.
- EASTER BONNET (D,up) Soft rose pink full corolla, ruffled and cup-shaped, with green-tipped pink sepals.
- ENCHANTED (D,tr) Large flowers, corolla of bluish-purple overlaid with pink, sepals rose-red. Fine trailer. **Pat.**
- FANFARE (S, up) Striking red trumpets crown this vigorous triphylla-type hybrid. Distinctive foliage.
- FIREBALL (D, tr) Medium purple corolla has splashes of carmine, giving changeable effect of real beauty. Red sepals.
- FLORENTINA (1960-D, up) Striking color contrast of frosty white sepals and burgundy red corolla makes this new one outstanding.
- FLYING SAUCER (Semi-D, tr) Great orchid and red butterflies cover this natural trailer, fluttering lightly in every breeze.
- FOREVER YOURS (Semi-D, tr) Lovely pastel pink and violet blue trailer, with long, graceful recurved sepals.
- G. MONK (D, up) Compact plant, blooms heavily all season. Medium flowers are deep lavender and rose-red.
- GEORGANA (D, up) Beautiful huge double in pastel shades of soft blue, orchid and pink, with large, bright green leaves. **Pat.**
- GREAT SCOTT (1960-D, up) Large double flowers in lively red tones make a striking effect on this stiff upright grower. **Pat.**

PLEASE READ BEFORE ORDERING

Prices: 60¢ each for non-patented varieties.

85¢ each for patented varieties.

Remit with order by check or money order.

Postage: We pay postage on all orders **over** \$5.00 up to and including the 3rd zone from here — all of Oregon and Washington and part of Northern California. If **under** \$5.00, please add 50¢ for postage and handling.

Substitutions: If out of a variety ordered, we substitute one as near like it as possible, unless you specify no substitutions.

- GYPSY QUEEN (D, up) Bright carmine sepals above a large rose-mauve full corolla. Popular since introduction in 1865.
- HARVEST MOON (S, tr) Flaring white corolla with red sepals gives effect of great white butterflies.
- HINDU BELLE (S, up) White sepals and smoky red rolled corolla give this one true distinctive beauty.
- INNOCENCE (D, semi-tr) Corolla pure white, sepals white and pink-edged; early bloomer.
- JIM FAIRCLO (D, up) Deep red sepals and deeper corolla crown this tall, fast-growing plant, with lush foliage.
- KERNAN ROBSON (D, up) Orange-red corolla and lighter sepals are distinctive in color in this lovely fuchsia.
- KING'S RANSOM (D, up) Contrast of white sepals and deep purple corolla gives beauty to this vigorous upright.
- LADY BETH (D, tr) Huge flower, violet-blue corolla with some petals rolled, and pale rose sepals.
- LEONORA (1960-S, up) Bell-shaped, true pink blossoms cover this strong upright plant for a long season of bloom.
- LILAC 'N ROSE (D, tr) Clear, rosy pink rolled corolla and long white sepals combine to make an effective trailer.
- LORD BYRON (S, up) Low-growing, fine for border plant; very deep purple corolla, bright red sepals. Heavy bloomer.
- MAMA BLEUSS (1959-D, tr) Large flowers of pink and true blue on this natural trailer grow in distinctive shape similar to ENCHANTED. **Pat.**
- MARINKA (S, tr) Gay, showy plant with many all-red medium flowers and reddish foliage. Stands heat well.
- MIDNIGHT SUN (1960-D, up) Large, full corolla is burgundy red with splashes of carmine and salmon pink; sepals pink and carmine. Tall grower.
- MISS CALIFORNIA (Semi-D, tr) White corolla, pink veined, with pink sepals: makes lovely basket or tree with continuous bloom.
- MISS VALLEJO (D, up) One of the largest double pinks yet introduced; can be pinched to make a basket. **Pat.**
- MORNING LIGHT (1960-D, semi-tr) Unusual light green foliage sets off the lovely blooms, with lavender blue and pink corolla and white sepals flushed pink.
- NIGHTINGALE (1960-D, tr) Large, frilly tricolor of white, pink and purple shades. Unusual and striking.
- OREGON TRAIL (S, up) Flat, saucer-like corolla gives effect of lavender butterflies with red accents.
- PAPA BLEUSS (D, semi-tr) Beautiful combination of light pink and violet shades; good bush or trailer. **Pat.**
- PINK FAVORITE (1960-D, up) Lovely light pink double in low-growing pot or border plant. **Pat.**

- PINWHEEL (D, up) Large, flat double in pastel shades; beautiful form and colors of pink and orchid.
- PLUM PUDDIN' (1959-D, tr) Deep red sepals are recurved against a long red tube, with plum colored corolla. Good bloomer.
- PURPLE SAGE (S, tr) Corolla deep purple, saucer-shaped, and sepals red and recurved. Good in heat as well as cool climate.
- RAMBLING ROSE (1959-D, tr) Very heavy bloomer with sepals and corolla of an unusual soft rose color, new in a trailer.
- RED JACKET (D, tr) Really spectacular, this one has a large, fluffy white corolla and bright red sepals. **Pat.**
- SHADY LANE (D, tr) Tube and broad, recurved sepals are clear coral pink tipped green; full double corolla is lilac blue splashed with pink.
- SLEIGH BELLS (S, up) Long, spreading white sepals above a bell-shaped white corolla give this one real beauty.
- SO BIG (D, tr) Largest of the pink and white trailers, this one lives up to its name, and has delicate beauty besides.
- STANFORD (S, up) An effective miniature, with masses of red and white dainty blooms and delicate, bronze foliage.
- STRAWBERRY SUNDAE (D, tr) Well-named as to corolla color, set off effectively by waxy, green-tipped ivory sepals.
- SWINGTIME (D, tr) Probably the outstanding favorite of the red and white trailers; gay and prolific.
- THUNDERBIRD (D, tr) Natural trailer, self-branching; very long tube and sepals are rose-red, double corolla is vermillion spreading to China rose. Early, profuse bloomer. **Pat.**
- ULTRAMAR (D, up) Full, round corolla is lovely gray-blue, with wide recurved white sepals. Will trail.
- VIOLET GEM (Semi-D, semi-tr) Deep violet corolla spreads wide, with carmine red sepals. Versatile, makes fine trailer, bush or tree.
- VOODOO (D, up) A strong grower of distinctive beauty, with deepest purple corolla and dark red sepals. **Pat.**
- WAIKIKI (D, tr) The large corolla is of spirea red, with tube and recurving sepals of white flushed pale pink. **Pat.**
- WALTZ TIME (1959-D, tr) Unusually lovely double light pink trailer, with some petals folded; foliage is fine, and growth strong.

SPECIES AVAILABLE

Boliviana	Magellanica Gracilis
Cordifolia	Magellanica G. Variegata
Corymbiflora	Magellanica Pumila
Fulgens	Procumbens
Isis	Splendens
Macrostemma Alba	

ADDITIONAL FUCHSIAS AVAILABLE IN LIMITED QUANTITIES

FUCHSIA CULTURE

Location Fuchsias are plants for full or part shade, though some varieties such as the commoner small-flowered types and some of the red single-flowered ones will stand a good deal of sun. The big whites and pastels, particularly, need more shade. The filtered shade given by a lath house or a large tree is ideal.

In a cool climate, many fuchsias will stand sun all day if given protection from wind.

Soil Use a somewhat acid soil, rich, light and friable. A good mix is about $\frac{1}{4}$ leaf mold, $\frac{1}{4}$ Blue Whale peat moss and $\frac{1}{2}$ good garden soil, with a little sand mixed in. Other organic fertilizers may be used in place of the Blue Whale, preferably cow manure. This makes a good summer mulch, also, holding the water and keeping the roots cool.

Watering Pots and baskets should be watered at least once a day, and more often in hot weather. Fuchsias love a shower on their foliage as well, and this helps to keep down pests at the same time. They do not like to stand with wet feet, however, so be sure drainage is good.

Those in the ground will take less frequent watering, but should not be allowed to dry out entirely, either.

Fertilizing Fuchsias are heavy feeders, only producing their maximum of bloom when well nourished. We suggest a weekly feeding of liquid fertilizer throughout the summer, used according to directions. In the Spring we use Rapid-Gro, high in nitrogen, followed later by Liquinox (10-10-5). There are many good fertilizers, including various fish emulsions, on the market; the important thing is to be faithful in using them. You'll be well repaid in beauty of foliage and bloom.

Insect Pest Control Frequent spraying to keep chewing or sucking insects from infesting your plants is a good preventative measure. Also spread slug bait under your plants. In the potting soil we use Miller's Soil-dusto to control weevils, cutworms, etc.

Pruning of Plants You can shape your fuchsia by pruning when dormant and by pinching tips when growing, and thus increase the beauty of the plant and the number of blooms.

For **baskets**, cut old branches back to the edge of the pot, cutting just to a node. As new branches grow out, pinch out tips until you have a well-shaped plant. Remember — whenever you **pinch**, you **double**.

For **bush** plants, cut back main growth to 3 or 4 good stems, leaving at least 2 pairs of dormant buds on each. For **trees** or **standards**, pinch out all side shoots until desired height is reached, then pinch top to make a leafy crown. Leave stem leaves intact.

Winter Care Fuchsias in the ground will live over in most areas if well mulched. If tops die down, new shoots will usually come up from the roots. Baskets or other potted plants can be wintered over in a greenhouse, in any cool but freeze-proof building, or in a well-drained and covered trench in the ground. Water occasionally during the winter.

Care of New Plants Like any other plants, but even more so than most, fuchsias should be well **watered** and **shaded** for at least a week after transplanting, until they become established in their new location.
